  <abstract label="Abstract">This collection comprises dance programs, dance school
  materials, photographs, and ephemera documenting the early career of the Boston-based
  African-American dancer, dance instructor, and civic official Mildred Davenport. The bulk of
  this collection consists of dance programs and dance school materials. The collection also
  contains 29 photographs of Davenport, her students in various performances, and friends or
  individual students. Dance programs from 1925 to 1942 feature her solo performances and
  group performances with her students. The collection includes a complete run of programs for
  Bronze Rhapsody, an annual performance series choreographed, staged, and directed by
  Davenport. Her personal copy of a typescript of stage directions for a 1934 performance is
  included with these programs. Her dance schools, Davenport School of the Dance and Silver
  Box Studio, are documented in course brochures and applications. Biographical and academic
  materials include a 1939 newspaper article on Davenport.</abstract>

### 1. A survey of attitudes of Canadian graduates in archival studies toward the...

**Titel:** A survey of attitudes of Canadian graduates in archival studies toward the roles of social science research in their profession

**Autor:** **McCarthy, Jane Bowe**

**Schlagwörter:** Archivists -- Canada -- Attitudes. ; Archives -- Research -- Methodology.

**Inhalt:** Social science research is a form of inquiry which is useful in expanding the knowledge-base of a profession, but one which is not normally associated with the archival profession. The purpose of this study is to examine social science research as it applies to the Canadian archival profession in general, and to archivists who have graduated from the Master of Archival Studies (MAS) degree program, at the School of Library, Archival and Information Studies at the University of ...

| <b>Inhalt:</b>         | The Journal of Strategic Information Systems (JSIS) has been an international outlet for Information Systems research that focuses on strategic issues since 1991. This paper reports on an analysis of the research published in JSIS to date. The paper presents a preliminary classification system for research topics related to Strategic Information Systems into which all 316 JSIS research papers as at end 2009 are classified. Discussion on changing emphases in topics over time is ...                                                                                                                                                                                                                                                                                                                                                         |

## Über BASE

---

### Die Suchmaschine

BASE ist eine der weltweit größten Suchmaschinen speziell für frei im Sinne des Open Access zugängliche wissenschaftliche Dokumente im Internet. Betreiber der Suchmaschine BASE ist die Universitätsbibliothek Bielefeld.

Mit zunehmenden Erfolg der Open-Access-Bewegung entstehen immer mehr Repository-Server, die ihre Inhalte über das "Open Archives Initiative Protocol for Metadata Harvesting" (**OAI-PMH**) bereitstellen. BASE sammelt, normalisiert und indiziert diese Daten.

Neben den OAI-Metadaten werden ausgewählte Webseiten und lokale Datenbestände der Bibliothek indiziert, die über eine **Suchoberfläche** zusammen recherchierbar sind.

BASE ist registrierter **OAI-Service-Provider** und war am EU-Projekt **DRIVER** ("Digital Repository Infrastructure Vision for European Research") beteiligt, welches Ende 2009 erfolgreich abgeschlossen wurde.

### Über BASE: Die Quellen (Liste | **Karten**)

---

Sie finden hier eine Liste aller von BASE indizierten Quellen. Wenn Sie ein Repository betreiben, das nicht in dieser Liste zu finden ist, dann schreiben Sie uns eine **Nachricht**.

Über BASE sind zur Zeit durchsuchbar:

"Taming the vast –and growing– digital data-sphere" and "The sum of knowledge – online and accessible, no less" are two articles featuring DRIVER published on the [ICT results site](#), an editorial service created for the European Commission.

**DRIVER search portal** - Access the network of **freely accessible** digital repositories with content across academic disciplines with over **2,500,000 scientific publications**, found in journal articles, dissertations, books, lectures, reports, etc., harvested regularly from more than **249 repositories**, from **33 countries**.

**DRIVER: Networking European Scientific Repositories**

Considered the largest initiative of its kind in helping to enhance repository development worldwide, DRIVER is a multi-phase effort whose vision and primary objective is to create a cohesive, robust and flexible, pan-European infrastructure for digital repositories, offering sophisticated services and functionalities for researchers, administrators and the general public.

DRIVER has established a network of relevant experts and Open Access repositories. DRIVER-II will consolidate these efforts and transform the initial testbed into a fully functional, state-of-the art service, extending the network to a larger confederation of repositories. DRIVER is integral to the suite of electronic infrastructures that have emerged in the worldwide GÉANT network and is hence funded under the e-Infrastructures call of the European Commission's 7th framework programme. It aims to "... optimise the way the e-Infrastructure is

## **SOCIAL JUSTICE AND GENETIC ENGINEERING: WHAT PLATO MIGHT HAVE SAID**

***C Botha***

*University of Pretoria*

---

### **Introduction**

In this paper, I explore the concepts of self-realisation, health and justice as they specifically pertain to human genetic engineering. Genetic engineering is a fledgling, but rapidly developing set of technologies, whose application will have a dramatic impact upon man and his conception of himself. It is for this reason that I feel it is important that we decide whether its use will be a just or unjust practice within our society, before its envisaged applications are made available for our use on a large scale.

**Abstract:** This article is a revised and extended version of [VBG, 07]. We conjecture that the digitalization of historical text documents as a basis of data mining and information retrieval for the purpose of progress in the history sciences is urgently needed. We present a novel, specialist XML tool-suite supporting the working historian in the transcription of original medieval charters into a machine-readable form, and we also address some latest developments which can be found in the field since the publication of [VBG, 07].

**Keywords:** History-Informatics, Digitalization and Preparation of Medieval Documents for the Semantic Web, XML Tagging, Tool-Support.

Qui scit ubi scientia habenti est proximus.

**Wer weiß, wo das Wissen ist, ist dem Wissenden am nächsten.**

(Otlet, Paul: Traité de documentation. Bruxelles: Mundaneum 1934, p. 2)

Paul Otlet ( 1868-1944), Begründer der systematischen  
Bibliologie: Katalogsaal im Palais mondiale 1903

" ... der Arbeitstisch wird mit keinem Buch mehr belastet sein. An ihrer Stelle befindet sich ein Bildschirm und in Reichweite ein Telephon. Fern an ande-rer Stelle befinden sich in einem riesigen Gebäude die Bücher und alle Infor-mationen ... Von dort erscheint auf dem Bildschirm die Seite zum Lesen, um die Antwort auf eine über Telephon gestellte Frage zu bekommen, mit oder ohne Drahtverbindung. Ein Bildschirm wird doppelt, vierfach oder zehnfach sein, wenn es sich darum handelt, die Texte und die Dokumente gleichzeitig zu zeigen; es wäre ein Lautsprecher da, wenn das Sichtbare durch eine ge-hörte Information, das Sehen durch das Hören ergänzt werden muß. Heute Utopie, weil nirgendwo solches existiert, aber sie kann Realität werden, so-fern sich unsere Methoden und Werkzeuge noch verbessern. Und diese Ver-besserung könnte soweit gehen, daß die Dokumente automatisch auf Anfor-derung auf den Bildschirm geliefert werden, automatisch auch die hinterein-ander folgende Anzeige ..." (Otlet, Traité de documentation, 1934, p. 428)
